BY WILLIAM G. GLENN, PH.D. SAN ANTONIO, TEXAS

"Every elementary and middle school science teacher of the gifted, and students who excel in science should own a copy of this book! For the good of science education in the public schools and the good of this nation, I urge you to order copies of this book." Michael E. Walters, Ed.D. New York City Public Schools.

● Dr. Glenn is a highly experienced science educator. He was a scientist with the United States Air Force (USAF) for 15 years, a Visiting Scientist with the San Antonio, Texas School District for six years, and a Science Demonstrator for Region 20, Texas Education Service Center. He has also been a Junior High School Teacher and a College Instructor.

● The science lessons/experiments in EARTH, WIND AND SKY! emphasize Hands-On Learning by Discovery. They stress the development of Critical Thinking Skills, Inductive Reasoning, and Mathematical Reasoning.

● THIRTY-FOUR science lessons/experiments are described in great detail in the following Natural Science Areas: ASTRONOMY, GEOLOGY, METEOROLOGY, OCEANOGRAPHY, AND PALEONTOLOGY.

● Each lesson/experiment contains the following information: SUBJECT [Objective(s), Time Involved, Vocabulary, Materials], ENGAGEMENT, EXPLORATION, EXPLANATION, ELABORATION, and EVALUATION.

● No expensive science equipment is necessary. Most materials are basic school supplies such as protractors, meter sticks, index cards, compasses, scissors, modeling clay, and graph paper!

● Examples of lessons/experiments are: (1) HOW LARGE IS THE SUN? (2) SEE THE SOLAR SYSTEM (3) WHAT ROCK IS THAT? (4) WHAT'S BELOW THE EARTH'S SURFACE? (5) HOW AND WHY IS AIR PRESSURE MEASURED? (6) WHAT IS ON THE OCEAN FLOOR? (7) HOW TO UNDERSTAND FOSSILIZED FOOTPRINTS (8) WORKING AT "DIGS."

● Includes an extensive BIBLIOGRAPHY! Science books of interest to both gifted students and their teachers are listed in this BIBLIOGRAPHY.
