## FOREWORD

*To effectively provide enrichment beyond the classroom, an educator must create a flexible learning environment that encourages individual ideas while catering to all thinking styles. Excellence is not an act, but a good social habit developed by a positive approach to maximum potential learning. The activities in this book are designed to meet this need by encouraging individualized highly motivated creative learning through differentiated processes and products. There are many open-ended activities that can be adapted to any level or ability. All activities meet individual needs within a creative problem-solving framework.*

*“Beyond Classroom Enrichment” contains many hands-on activities organized in an easy to read format for students. This book can easily serve as a workbook for all students. Each chapter contains a creative motivational review section where students can check their knowledge and ideas for extra activities. The teacher section contains goals, objectives and topic specific ready-to-use rubrics for every activity.*

*Many activities in the book are web supported. The Beyond Classroom Enrichment Website found at <http://geocities.com/bcenrichment> has many supplemental activities that correlate with this book. Every activity that has web connections is designated with the icon shown at the right.*

*This book contains enough motivational activities to cover one year’s gifted program. During the past five years, students voted these activities as the best and most interesting activities they have ever completed.*

# Contents

## *About the Author*

Mark Wood has motivated gifted students for over twenty years as a public school gifted educational specialist with the Downingtown Area School District. He has developed his own gifted curriculum and implemented a widely respected integrated elementary gifted program. His master's degree is in elementary and secondary school administration from Villanova University. He specializes in mathematics and computer curriculum correlation and has doctoral courses from Widener University in Pennsylvania.

Mark has published many written documents including books, journal articles and websites. He has been a featured speaker at many gifted conventions throughout Pennsylvania. All the activities in this book are being used in his gifted program and have been successful with upper elementary-aged students.

Mark currently resides in Lancaster, Pennsylvania with his wife and teenage son. Besides writing, Mark spends his spare time officiating baseball games in the East Coast Tournament Baseball League.

Mark welcomes comments and feedback. He is available for consultant work and research implementation in the field of gifted education. Contact him at [mwood199@comcast.net](mailto:mwood199@comcast.net).
