

Band-Aid

Come to the Aid of...

Band-Aids are more colorful today than they have ever been. Every time you go into a store, there's a new design on the shelf. But the shapes just seem to stay the same year after year. The protective pad is round or rectangular, but why are all the bandages long and narrow with curved edges? There's got to be a new Band-Aid that is more than just a paint job on an old shape. Brainstorm at least twenty new ideas!

Need a Band-Aid?

You've been hired to create a catchy advertising rhyme for a popular Band-Aid company. You can suggest the video, but your real job is to come up with the best rhyming jingle or limerick you can. Submit at least ten different ones, each with at least six lines.

Pennies

Making Changes

"Find a penny, pick it up, and through the day you'll have good luck." Maybe they're good luck because they're 'different'. The only color coin in the US treasure today is the penny. We did try a gold tone coin a few years back, but that just didn't work out. The collectors loved it; the businesses did not have a place for it in the cash register tray. Why are all the other coins gray or silver and look like cheap aluminum foil? Let's help the other coins get their own identity. Design a new nickel, dime and quarter. You must change its color and explain what material you would use in its production to make it that color. You must also redesign one or both sides of the coin.

Pocket Comb

Comb through This

Using the comb as a part of a picture, draw as many things as you can. The entire comb must be part of the picture. Remember to think of the comb as its normal size, an enlarged item, and a miniature item.

Comb Creations

How many different ways could you use a comb (or combs) to create a work of art?
